Noxious Weed Management Program

The goals of the program are to:

- prevent the introduction of new invasive plant species
- eradicate species with isolated or limited populations
- contain and manage those invasive species that are well established and widespread

To accomplish these goals the program:

- implements preventative strategies to reduce the opportunity for new invasive species
 - provides information and resources to local weed managers
- helps establish local weed management areas emphasizing coordinated efforts among

- educates public agency staff and private citizens about the negative impacts associated with noxious weeds
